

TEMPERATURE DETECTOR

The temperature detector easily adds temperature monitoring of specific areas into your PalCare System. Alerts are provided when the temperature goes above or below the set thresholds.

PAL-110030

Features

- Mounting bracket included.
- Pre-configured with 80°F high and 40°F low threshold.
- Programmable threshold with PAL-110040 cable.
- Fully supervised.
- Case tamper protection.
- Automatic reset.
- Pre-configured with high and low thresholds and high and low set points of 80°F and 40°F.
 - PAL-110040 Programming cable is required to customize high and low thresholds.
- Customize the temperature detector to monitor temperature in a variety of applications including server rooms, storage areas, refrigerators, freezers, and pipes for pre-freeze warnings.
 - PAL-110050 External temperature probe is required for external monitoring applications.

Specifications

- Frequency: 900 MHz
- Dimensions: 3 1/2" x 1 5/8" x 7/8"
- Color: Beige
- Battery: CR123A lithium ion battery **PAL-115100**
- Battery Life: 2 - 3 years
- Transmitter Environment: -4°F - 140°F (Non condensing)
- PAL-110040 Programming cable to change thresholds

- PAL-110050 for remote temperature probe
Monitoring Range (-40°F-140°F)
