

EXTERNAL TEMP/HUMIDITY LOGGING SENSOR

The external transmitter and remote sensor monitors harsh environments where temperature, condensation, or humidity fluctuations are a concern. Report logs of temperature and humidity provide easy monitoring.

PAL -210050

Features

- Mounting bracket included.
- Transmits and logs temperature and humidity upon significant changes every 5 minutes for regulatory compliance and staff efficiency.
- Temperature range of -4°F to 140°F.
- Humidity range of 0 to 100% relative humidity.
- Fully supervised.
- Case tamper protection.
- Automatic reset.
- External temperature / humidity sensor.

Specifications

- Frequency: 900 MHz
- Dimensions: 3 1/2" x 1 5/8" x 7/8"
- Color: Beige
- Battery: CR123A lithium ion battery **PAL-115100**
- Battery Life: 2 - 3 years
- Transmitter Environment: -4°F - 140°F (Non condensing)
- Sensor Environment: -4°F - 140°F and water resistant
- Typical Accuracy: .5°F and 2% relative humidity

Usage

- Temperature controlled areas or rooms
- Refrigerators
- Freezers
- Medication Refrigerators
- Units may be purchased separately
